We feel our efforts of over half a Century have been a great accomplishment to the Horticultural World, placing in front our own originations that have proven themselves worthy of recognition by the world's best judges at all the leading shows. Our large flowering types, miniature, lacinated and greatly improved primulinus are proven specimens of world leadership.

The past three years we included in our general listing several of the more popular and leading varieties of other growers, making it possible for us to furnish bulbs of our quality, grown here at our farms. This will give an opportunity to our customers to have the best that is possible in Gladioli.

It should be remembered that gladioli enjoy sunshine and should not be planted in shady places. Plant in rows, borders, among shrubbery, roses, and flowers, etc., or in separate groups.

Magic Lily

LYCORIS SQUAMIGERA

MAJESTIC GRACEFUL — IT HAS NO EQUAL

Imagine if you can a beautiful flower stalk springing out of the ground to a height of about 2 feet with no foliage. That is just what the Magic Lily does. Bulbs of this unusual flower are quite rare and are not offered generally.

Early in the spring attractive green foliage appears and grows until July when it ripens and then disappears. About a month later as if by magic — which accounts for the name — the flower stalks spring from the ground to a height of 2 to 3 feet. The lily-shaped flowers growing in crown formation are marvelous. Color of a delicate lilac-pink, with 8 to 12 blooms make up this upright stalk.

Orders accepted now for shipment to be made in July and August as bulbs are dormant at that time. You will be rewarded with blooms in early September. Plant bulbs 4 to 6 inches deep.

We recommend this unusual type flower most highly. Limited stock — so order now without delay.
